## Westworth United Church Revised Reopening Plan Addendum January, 2022

Several adjustments and additions have been made to the current plan as indicated below:

- 1. Contractors:** All contractors entering the building must be 14 days post double vaccination. Any exceptions to this requirement must be discussed and approved by the Property Team.
- 2. Communion:** Use of prepackaged communion elements will continue. A gluten-free option and easier to open juice glasses will also be provided.
- 3. Singing as part of in-person worship:** All music leaders will continue to physically space and wear N95 masks. If Worship includes congregational singing, surgical masks will be distributed as people enter and participants will be asked to wear these or their own N95 masks (or recognized equivalent) while in the sanctuary. Decisions made about singing will be made jointly by the Worship Team and Safe Reopening Committee.
- 4. Greeter Instructions:** Instructions for greeters have been adjusted to include the distribution of surgical masks when worship services include congregational singing.
